

## **ROLE: Cloud Infrastructure Lead**

### **COMPANY DESCRIPTION**

RealmSurf Inc. is a startup that aims to combine Virtual Reality travel media with Artificial Intelligence to produce groundbreaking immersive experiences.

We are inspired by a vision where people can explore the world's many wonders for under \$100. We imagine users surfing from realm to realm with artificial intelligence that can reveal the earth's secrets to them. And we dream about explorers inviting their friends and family into a media experience that is all encompassing.

At RealmSurf, we believe that VR + AI = A World of Possibilities.

### **EMPLOYMENT TYPE**

Co-founder / Voluntary

### **THE CHALLENGE/ OPPORTUNITY**

RealmSurf is seeking to create a robust and diverse team of innovators and technical specialists that will:

- 1) Collaborate on a functioning prototype platform that combines VR with AI.
- 2) Be able to successfully fundraise from angel and crowd investors.
- 3) Forge commercial alliances with other players in the emerging VR and AI sectors.

This opportunity does not pay hard dollars – at least not initially. It is for an adventurous and entrepreneurial individual who wants to:

- Work for an ownership stake in a new age media company;
- Help build an inclusive and visionary enterprise from the ground up;
- Be involved in key decision making from the get-go;
- Be a leader and a team-player at the same time;
- Innovate, collaborate and bootstrap in an agile manner.

## **JOB DESCRIPTION**

You will collaborate with a diverse and passionate team of individuals on a prototype platform that merges VR travel media with AI technology.

Your 3 core objectives will be as follows:

1. Conduct in-depth research into established and emerging cloud platform service providers, and determine which one will offer the best value for money when it comes to hosting and streaming VR content.
2. Conduct research into VR content compression techniques/tools, and identify which ones will work best for RealmSurf content.
3. Proactively manage relationships with 3<sup>rd</sup> party cloud service providers, and lead efforts to ensure that the platform user experience is smooth and free of content buffering problems.

## **DESIRED ATTRIBUTES, SKILLS AND EXPERIENCE**

- Proficient in English, with strong verbal and written communication skills.
- Familiarity with and passion for VR content and prominent VR headsets.
- A college major or masters in computer science is important.

## **LOCATION**

Preferably San Francisco and the Bay Area: however, working remotely is OK.

## **INITIAL COMPENSATION**

Equity share negotiable. 4 year vesting with 1 year cliff.
